

Improving the Quality of International Mail

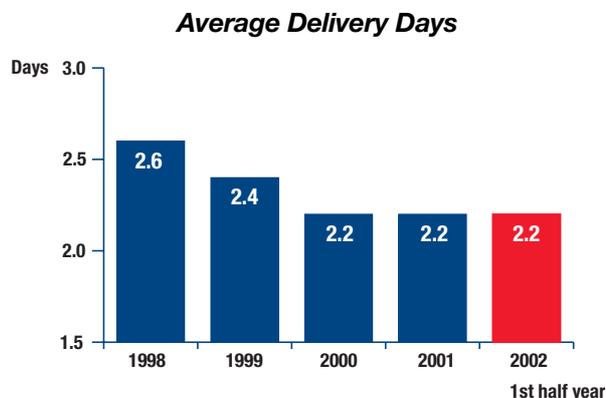

First Half Year Results 2002

U N E X

European Postal Service Objectives Exceeded

Consistent high performance by European Postal Services continued in the first half of 2002, once more exceeding on average the European Union objectives. This achievement is a demonstration of the commitment of the European Postal operators to providing customers with consistently reliable postal service of a high quality.

During the first half of 2002, the UNEX end-to-end performance measurement system results show that 93.9 per cent of first class, intra-European mail was delivered to the final addressee within three days of posting (J+3). This represents an improvement of 9.3 percentage points compared with the same period in 1998, and an increase of 0.8 point compared with the first half of last year. The average delivery time was 2.2 days.

European Postal operators continue to perform far above their objectives:

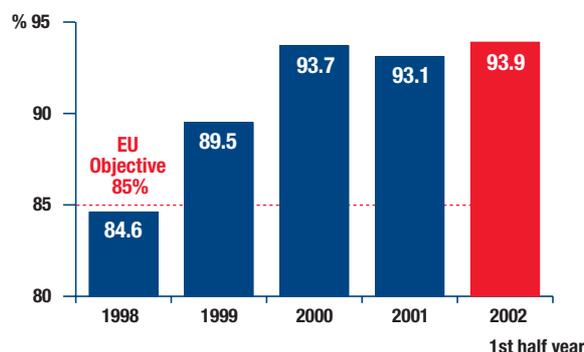

- **J+3 performance, the speed indicator**, has improved from 69.5% during the first half of 1994, when the UNEX

study started, to 93.9% for the same period in 2002, exceeding the 85%-objective by 8.9 percentage points.

- **J+5 performance, the reliability indicator**, has also improved over time with 98.9% of all mail reaching its final destination within five days of posting (J+5), exceeding the objective set at 97%.

Along with the level of results achieved on average, the consistency of performance that customers receive on a country-to-country basis is another important element for assessing postal quality of service in Europe: 80 percent of the 306 European country-to-country streams now meet or exceed the 85%-objective, up from a half in 1998, and one third in 1994.

Delivery Performance in J+3

The high level of overall quality of service is the result of constant efforts made by International Post Corporation's member Postal operators to improve international and domestic operations. Maintaining high service performance for all customers remains the priority.

RESEARCH INTERNATIONAL

International Post Corporation

Europe includes members of EU, Iceland, Norway and Switzerland. J (Jour, for Day) is the day of posting and e.g. +3 expresses the number of days required for collection, transportation and distribution to the receiver. The accuracy on the above results ranges between 2 and 10 percent within a 95% level of confidence.

RESEARCH INTERNATIONAL

International Post Corporation

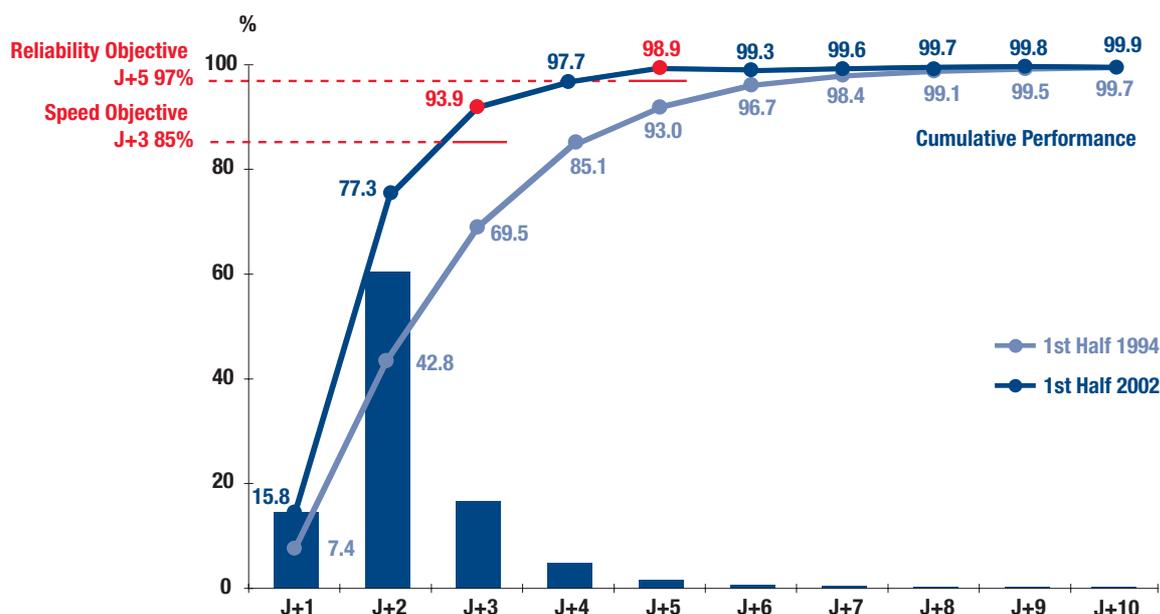

Europe includes members of EU, Iceland, Norway and Switzerland. The method of calculation is based on a five days business week – that is to exclude Saturdays and Sundays, and to exclude national and regional public holidays in the destination country. The following countries have Saturday mail delivery: Denmark, France, Germany, Italy, Netherlands, Norway, Switzerland and United Kingdom.

Service Standards for International Mail within Europe

European member Postal operators of International Post Corporation (IPC) have agreed to common service standards of J+3 (speed) and J+5 (reliability) for the delivery of first-class international mail within Europe. J (jour for day) is the day of posting. The +3 and +5 express the number of days before final delivery during which time collection, sorting, national and international transport, and delivery take place.

Objectives have been set by the European Union's directive on postal services for 85 per cent of mail to be delivered within J+3 and 97 per cent within J+5, on a country-to-country basis. Results from UNEX Monitoring show that, over time, Europe's Postal operators have enhanced their customer service in terms of both speed and reliability, and have exceeded both objectives, on average.

Europe | Distribution per Delivery Days | First Half Year 2002

One Million Test Letters

In 2002, more than one million test letters of representative types and sizes will be sent into 306 country-to-country mail streams, over all regional routes, covering both urban and rural areas in Europe, and into 430 city-to-city links within North America, and between North America and Europe.

The UNEX Monitoring System

IPC Members publish UNEX results twice a year. The three key performance indicators presented in this brochure are the percentage of mail items delivered: within three days (J+3), the speed indicator; within five days (J+5), the reliability indicator, and the average number of delivery days taken to deliver mail.

IPC implemented the Unipost External Monitoring System (UNEX) as one of its members' initiatives to

improve quality of service for international mail customers. The UNEX monitoring system provides essential data as the basis for action to improve service levels. It measures end-to-end postal delivery performance for intra-European priority letter mail, from time of posting to time of delivery.

The validity of the statistics it produces is guaranteed by an independent contractor, which, since January 1998, has been a British, ISO9001-certified company, Research International.

The UNEX Statistical Design

UNEX measurement is carried out continuously. The system's statistical design represents the real flows, patterns and characteristics of international mail. The accuracy of the country-to-country quality of service results presented in this report ranges between 2 and 10 per cent on a half year basis, within a 95 per cent level of confidence.

The International Post Corporation

The International Post Corporation (IPC) is a cooperative association of 22 national postal operators. IPC supports its members by facilitating improvement in international postal services. IPC's members are: Österreichische Post AG, Austria; De Post/La Poste, Belgium; Canada Post; the Department of Postal Services, Cyprus; Post Danmark; Finland Post Corporation; La Poste, France; Deutsche Post AG, Germany; Hellenic Post ELTA, Greece; Magyar Posta, Hungary; Iceland Post; An Post, Ireland; Poste Italiane S.p.A.; Postes et Télécommunications, Luxembourg; TPG NV, the Netherlands; Norway Post; CTT Correios de Portugal SA; Correos y Telégrafos, Spain; Posten AB, Sweden; Swiss Post; Consignia plc, the United Kingdom; and the United States Postal Service.
